# Micro820™ Programmable Logic Controller

Bulletin 2080 Product Profile

#### **Features and Benefits**

- Features optimized for small standalone machines and remote automation projects
- EtherNet/IP<sup>™</sup> for Connected Components Workbench™ programming, RTU applications and **HMI** connectivity
- · Built-in Real Time Clock (RTC) with no battery required
- microSD<sup>™</sup> slot for program transfer, datalog and recipe
- · Selected models available with removable terminal blocks for easier wiring and installation
- 5 KHz PWM Output for controlling solenoids and valves

The new Allen-Bradley Micro820 20pt controller is specifically designed for small standalone machines and remote automation projects with embedded Ethernet and Serial ports. It can function as a RTU (remote terminal unit) for remote machines with support for Modbus RTU and TCP. It has embedded support for 4 thermistor temperature inputs for use as a DDC (direct digital controller) for Building Management Systems.

The Micro820 supports an embedded microSD slot that can be used for storing large amounts of data that normally cannot fit into memory for applications that require datalog and recipe. All files are stored in CSV text format for easy viewing and editing. The microSD card is also used for backing up and restoring the program, which can be used for duplicating the program in several machines.

The Allen-Bradley Micro800 Remote LCD Display connects to the controller's embedded RS232 port and works as an essential accessory for the Micro820 controller. With 4 or 8 lines of ASCII text and a tactile keypad, it can be used as a simple HMI. Its system menu is available in multiple languages for direct viewing and editing of controller variables. Controller's Ethernet address can also be easily set from the menu. Supports front panel mounting as well as DIN rail mounting next to the controller.

## Micro800 Remote LCD Display

- USB port for program download to controller
- IP65 for front panel mount
- Configurable start-up screen

\*Readings on LCD Display are for illustration purposes only,
